

## Allergies & Allergic Reactions

### Policy statement

At The Play Cabin, we are aware that children may have or develop an allergy resulting in an allergic reaction. Our aims are to ensure allergic reactions are minimised or, where possible, prevented and that staff are fully aware of how to support a child who may be having an allergic reaction.

### Our procedures

- When children start at the preschool, we ask their parents if their child suffers from any known allergies. This information is recorded on the Registration Form.
- If a child has an allergy, we complete a risk assessment form to detail the following:
  - The allergen (i.e. the substance, material or living creature the child is allergic to such as nuts, eggs, bee stings, cats etc).
  - The nature of the allergic reactions (e.g. anaphylactic shock reaction, including rash, reddening of skin, swelling, breathing problems etc).
  - What to do in case of allergic reactions, any medication used and how it is to be used (e.g. EpiPen).
  - Control measures - such as how the child can be prevented from contact with the allergen.
  - Review measures.
- The risk assessment is shared with all staff.
- A copy of the risk assessment is kept on the child's file and details are also displayed on the kitchen/ kitchette in both rooms.
- Our staff are made aware of the signs and symptoms of a possible allergic reaction in case of an unknown or first reaction in a child. These may include a rash or hives, nausea, stomach pain, diarrhoea, itchy skin, runny eyes, shortness of breath, chest pain, swelling of the mouth or tongue, swelling to the airways to the lungs, wheezing and anaphylaxis.
- During registration we inform parents that we have a 'No Nuts Policy'. Parents must not send in packed lunches/ snacks that contain nuts.
- Our staff sit down with the children at lunch time and supervise to ensure that children do not share food.
- If a child has an allergic reaction to food, a bee or wasp sting, plant etc. a first-aid trained member of staff will act quickly and administer the appropriate treatment, where necessary. We will inform parents and record the information in the incident book and on the allergy register.
- If an allergic reaction requires specialist treatment, e.g. an EpiPen, then at least two members of staff working directly with the child and the manager will receive specific medical training to be able to administer the treatment to each individual child.
- At all times we ensure that the administration of medication is compliant with the Safeguarding and Welfare requirements of the Early Years Foundation Stage.

## Transporting children to hospital procedures

The preschool manager/staff member must:

- Call for an ambulance immediately if the allergic reaction is severe. DO NOT attempt to transport the sick child in your own vehicle
- Whilst waiting for the ambulance, contact the parent(s) and arrange to meet them at the hospital
- Arrange for the most appropriate member of staff to accompany the child, taking with them any relevant information such as registration forms, relevant medication sheets and medication.
- Redeploy staff if necessary, to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Inform a member of the management team immediately
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.
